

Harnessing Legacy into Infrastructure Excellence

With business excellence of more than **75 years** & and an unwavering commitment to sustainability with the authoritative brand in Distributed Energy, Solar Module and Products, Jakson is making green energy the backbone of a carbon-neutral future through making inroads in Green Energies, Biofuels, Electrolysers, and Fuel Cells, Utility-Scale Battery Energy Storage Systems (BESS) and Solar Operations & Maintenance Services. Our solutions & technologies are acknowledged across India, the Middle East, SAARC nations, and African Sub-Continents.

Jakson Infra has been successfully harnessing this business excellence in its pursuit to become an aspirational infrastructure company for transforming landscapes, connecting communities, and fostering sustainable progress for a brighter future. Furthermore, it motivates us to adopt a revolutionary approach to products, technologies, processes, and services.

Jakson Infra

Charting Business Milestones

Business Segments

CIVIL INFRASTRUCTURE

Jakson Infra deploys the latest technology and equipment to execute smooth, safe, long-lasting, high-quality projects in IT infrastructure, Medical facilities, Highways, and Smart city projects. We focus on constructing world-class infrastructure across segments in urban infrastructure, public spaces, data centres and industrial. We have a team of skilled engineering professionals with decades of experience in design and in-house EPC (Engineering, Procurement, Construction) with the experience in the commissioning of infra projects across a wide range of sectors.

POWER TRANSMISSION & SUBSTATION

Jakson Infra implements transmission & substation projects up to 400 kV. We offer comprehensive turnkey solutions, leveraging our proficiency in Design, Engineering, Product Procurement, Project Management, and related services. With a skilled engineering workforce, we excel in delivering intricate projects within specified timelines and budget constraints. Boasting decades of experience in the electrical industry, Jakson has completed numerous esteemed projects for state utilities in India and internationally.

RURAL ELECTRIFICATION

With its end-to-end electrification services to commissioning model, Jakson Infra is a leading contractor in India for Urban and Rural electrification projects. Providing access to electricity to every household in the country is a key policy initiative of the Government of India (GOI). Jakson Infra has effectively partnered with central and state bodies in key development programmes such as Restructured Accelerated Power Development, RAPDRP, and DDUGJY to assist the GOI in fulfilling the goal.

ELECTRICAL AND MECHANICAL (E&M)

With a customized & end-to-end solution around Integrated Project Management, Jakson has been implementing various important metro projects in Bengaluru, Mumbai, Kolkata, & others. Jakson Infra offers its high efficiency in the design, engineering, installation, testing and commissioning of rail projects with the capability to build, power and connect substations. Our capacities lie in civil construction, power, and electrification of the overhead lines, comprised of installing the new lines and integrating them with renewable energy sources.

WATER

Jakson Infra has implemented various rural water supply projects comprising the tube wells, intake wells, WTP, rising or pressure mains, CWRs, overhead tanks distribution pipe networks, individual house connections, public stand posts, retrofitting, etc. We are instrumental in implementing the water supply network under the state water and sanitation mission (SWSM) in UP. Now, the business is more focused on implementing new technologies to ensure our projects' speed, quality, and safety.

Jakson Infra delivers end-to-end operations in EPC (Engineering, Procurement & Construction) for government, private, and global clients. Our collaborations with government partners involve the implementation of crucial projects, including State Grid Integration, Jal Jeevan Mission Electrification, RGGVY, DDUGJY, Metro Corridor, and others. We always strive to be the preferred partners, ensuring the timely delivery of projects.
